

lib/my/src/printf/case  
\_printf\_convert.c

```
graph TD; A["lib/my/src/printf/case  
_printf_convert.c"] --> B["my.h"]; B --> C["stdarg.h"]; B --> D["stdlib.h"];
```

The diagram illustrates a dependency structure. At the top, a gray-shaded box contains the text 'lib/my/src/printf/case' followed by '\_printf\_convert.c' on the next line. A blue arrow points from this box down to a white box labeled 'my.h'. From the 'my.h' box, two blue arrows branch out downwards to two separate white boxes: 'stdarg.h' on the left and 'stdlib.h' on the right.

my.h

stdarg.h
